

Projects on the move

In 2004, Reid Middleton and the rest of the Shilshole Bay Marina Project Team have been working on completion of all designs, finalizing permit approvals, awarding a GC/CM (General Contractor/Construction Manager) construction contract to oversee construction of docks, landside and utility infrastructure, and beginning construction. Pressler Engineering is providing mechanical engineering services for the new fuel piping and leak detection systems, as a subconsultant to Path Engineers.

Shilshole Marina

2284 Kalakaua Ave

Pressler Engineering has been selected to provide mechanical engineering for a new Retail/Restaurant complex at 2284 Kalakaua Ave in Waikiki, Hawaii. The project will include a mix of retail shops and two 6,000 sf restaurants.
