PROJECT UPDATES

Bullpen Market Renovation Safeco Field

"The Pen" involved transforming 25,000 SF of concourse area into an upscale multifaceted venue with several new cooking concessions, a fire pit, and over 200 flat screen CCTV systems.

Pressler Engineering, Inc. provided complete mechanical and electrical engineering for this work.

The Architect is Populous of Kansas City, Mo.

Artspace Everett Lofts

This project includes 40 units of affordable live/work studios, and two floors of commercial space. The project recently received full LEED Silver Certification.

Pressler Engineering, Inc. provided full mechanical design services, and LEED energy modeling.

The Architect is Doug Ito, of Stickney, Murphey, Romine Architects.

Waikiki Landmark

Waikiki Landmark is a 217-unit, 35 story luxury condominium project completed in 1993.

Pressler Engineering, Inc. recently completed a full building energy simulation study to investigate the potential energy savings of a new energy efficient central chiller plant.
